-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- application filed 9/27/03*
- 1) ☒ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Detailed Action**

**Objection to the Disclosure**

**37 CFR 1.163**

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

**35 USC § 112**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C 161, the requirements of 35 U.S.C. 112 are limited. The following is a quotation of 35 U.S.C. 162:

**Detailed Action**

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 35 CFR 1.163(a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear, and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More Specifically:

A. The disclosure is objected to under 37 CFR 1.121(e) because the Latin name of the genus and species of the claimed plant and Variety Denomination of the claimed plant should be preceded by a heading as set forth in 37 CFR 1.163(c)(4)(5) and 37 CFR 1.163(d). This information should be set forth before the "BACKGROUND OF THE INVENTION" section as set forth in 37 CFR 1.163(c).

B. Page 1, lines 15-18, Applicant states the instant plant was produced from seed from an open pollination. Applicant then states the instant plant was a naturally occurring mutant seedling. These recitations appear contradictory especially as each seed produced from the open pollination would be unique plants unless both parents were homozygous and all the seed would

be identical. Correction and/or clarification is necessary. The origin of the plant must be unambiguously set forth.

C. Page 1, lines 15-18, Applicant should set forth in the specification a brief comparison between the instant plant and its female parent, at least to the extent to distinguish the two plants from each other.

D. Page 1, line 20, Applicant should delete “characteristics” and insert --characteristic--.

E. Page 2, line 24, Applicant states “container”. It appears applicant may have intended to state --plant--. Correction and/or clarification is necessary.

F. Page 4, line 5, Applicant states “height”. It appears applicant may have intended to state --length--. Correction and/or clarification is necessary.

G. Page 4, lines 1-7, Applicant should set forth in the specification additional information relative to the instant plant’s stem including the typical and observed internode length.

**Detailed Action**

H. Page 5, lines 1 and 2, Applicant should set forth in the specification additional information relative to the instant plant's flower including the typical and observed flower depth and fragrance.

I. Page 5, line 4, Applicant sets forth a flower color. However, applicant has not stated whether the coloration set forth is for the upper, lower, or both surfaces of the tepals. Applicant should set forth in the specification a coloration for the upper and lower surfaces of the tepals with reference to the employed color chart.

J. Page 5, lines 6 and 7, Applicant should set forth in the specification additional information relative to the instant plant's tepals including the typical and observed tepal apex and margin descriptor.

K. Page 5, line 8, Applicant should set forth in the specification additional information relative to the instant plant's buds including the typical and observed bud shape.

L. Page 5, line 14, Applicant should set forth in the specification the number of pistils per flower.

### **Detailed Action**

The above listing may not be complete. Applicant should carefully review the disclosure and import into same any corrected or additional information which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

### **Claim Rejection**

#### **35 U.S.C. 112, 1st & 2nd Paragraphs**

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Objection to the Disclosure Section above.

### **Comments**

Applicant should note the new amendment format which is now mandatory (Web site stated below).
